Appendix – Reconciliation of Non-GAAP Financial Measures

RICHA

Reconciliation of Non-GAAP Financial Measures

"Net debt" and "net capital" are non-GAAP financial measures, and should not be considered in isolation or as an alternative to performance measures prescribed by GAAP. The table below reconciles "net debt" and "net capital" to debt and capital as calculated based on GAAP. We believe the ratio of net debt to net capital, also knows as "net debt-to-capital" is meaningful to investors as management uses the ratio in understanding the leverage employed in our operations and as an indicator of our ability to obtain external financing. Furthermore, we utilize this information for comparative purposes within our industry.
